Copilot AI Insights

- **Item & unit context:** The analysis focuses on **Item #69 – PASTA LINGUINE #12**, which primarily ships by **BOX** and typically has **~9.75 units on hand** [1] [2] [3] [4].
- **Recent demand level:** Over the latest 4 weeks, average actual usage is **2.0 units per week**, indicating modest but active movement [5].
- **Short- to mid-term forecast:** Predicted weekly demand gradually declines from **~1.01 units in one month** to **0.80 in three months** and **0.64 in six months**, suggesting a slow tapering rather than a sharp drop [5].
- **Historical pattern:** Actual weekly usage for the past year shows intermittent spikes (e.g., **7 units** in weeks of 2023-11-27 and 2024-02-05, **8 units** on 2024-10-21) with many **zero-usage weeks**, signaling **lumpy, event-driven demand** [6].
- **Smoothed trend behavior:** The smoothed movement trend peaked around **2.8 units** in late 2024 and again approaches **~2.9–3.1 units** by Oct 2026, but dips to **~0.5–1.0 units** in mid-year periods, indicating **repeating seasonal softness in late spring/early summer** [7].
- **Seasonality insights:** Seasonality is **strongly positive in January and early February** (e.g., spikes of **+1.99** and **+1.89**), while **late spring and early summer often show negative seasonal factors**, and there are **mixed but sometimes positive effects in late summer/early fall**, implying promotional or menu-cycle effects around those times [8].
